

YOUR HEALTHCARE SOLUTIONS PARTNER

HealthARCH, formerly the UCF Regional Extension Center, is transforming healthcare every day. A leader in the widespread adoption of Electronic Health Records (EHRs) since 2010, our work has expanded to include additional healthcare related services including Patient Centered Medical Home Transformation and Recognition, Compliance, and Revenue Cycle Services. We focus on assisting healthcare professionals to successfully function in and navigate today's marketplace.

Healthcare is Evolving

The demand for practices to be more efficient and patient-centered is increasing, and the use of EHR data has become integral to providing better care to patients. New value based payment models require providers to focus on quality and outcomes, and physicians need to be prepared to demonstrate both value and cost savings to remain competitive and maximize revenue.

Our team of professionals will help you to meet the challenges of today and prepare you to succeed in the future.
