

# PRIVACY AND SECURITY

## SECURITY RISK ASSESSMENT (SRA)

A Security Risk Assessment (SRA) helps to measure the impact of threats and vulnerabilities that pose a risk to the confidentiality, integrity and availability to electronic protected health information (e-PHI). Keeping patient information safe requires knowing the risks, threats and weaknesses in the processing, sharing and handling of your patients' information. We can help you mitigate those risks by conducting an in-depth assessment to help you prepare for possible HIPAA and Promoting Interoperability (formerly known as Meaningful Use) audits.

## HIPAA and e-PHI

Safeguarding your patient's protected health information (PHI) is paramount when it comes to the effectiveness of electronic health records. Failure to meet HIPAA standards can lead to hefty fines and penalties.

Conducting an SRA each year is a requirement for Promoting Interoperability (formerly Meaningful Use) that must be performed annually prior to attestation.

## The benefits of conducting an SRA

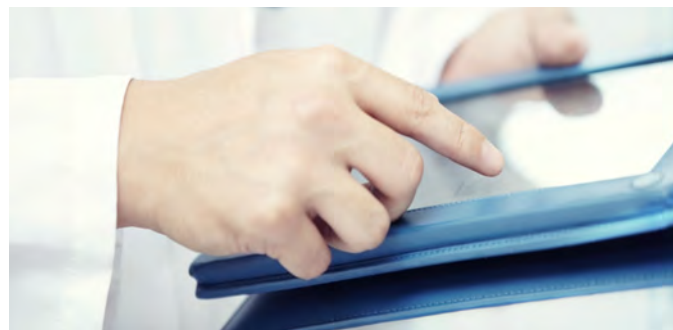

- Protect your practice against liability and fines due to security breaches
- Minimize your risk of a data breach, unauthorized access, and loss and/or corruption of data
- Identify threats and vulnerabilities to the practice's e-PHI
- Meet compliance requirements for HIPAA along with other industry rules and regulations
- Identify your practice's data systems and where e-PHI is located
- Meet Promoting Interoperability (formerly Meaningful Use) requirements to help eligible providers qualify for incentive payments

# OUR SERVICES

- Patient Centered Medical Home (PCMH)
- Patient Centered Specialty Practice (PCSP)
- MACRA Preparedness Education, Training & Support
- Promoting Interoperability (Meaningful Use) Support
- Audit Preparedness
- EHR System Evaluation, Selection and Implementation
- Privacy and Security Assessment
- ICD-10 & E/M Documentation Training
- Compliance Programs
- HIPAA Training
- Billing Audits
- Evidence Based Quality Improvement Programs

Our services will help you be prepared for the move to value based payment models. We will help you better manage your data, improve care coordination, and reduce costs.

We can help guide you through the complicated Health IT landscape... from MIPS and APMs to Promoting Interoperability (formerly meaningful use) attestation, to quality reporting standards, and successful patient engagement strategies.

## OUR EXPERTISE

Our staff of professionals are current on the latest policies and changes in healthcare reform including the move to MACRA's MIPS and APMs. We work directly with industry and government agencies to keep you up-to-date on how new policies can affect your practice.

## WE ASSIST

- Primary Care and Specialty Providers - including Mental Health and Dental Practices
- Provider Networks
- Hospitals / Health Systems
- Health Plans
- Accountable Care Organizations
- Medical Societies & Professional Associations

## OUR IMPACT

- More Than 3,000 Providers Assisted At Over 900 Organizations
- 1,363 Primary Care Providers Achieved Meaningful Use
- Over \$46.6 Million EHR Incentive Payments Earned
- 4,000 Medical Professionals Have Received Revenue Cycle Training
- Over 400 Providers Assisted With Medical Home Practice Transformation and Recognition
